10th April Tommy Thomas, Video & Sound.

Future programs for 2007

Video cam & sound.

Power Point RTA

New Vista system

MARK YOUR CALENDAR FOR OUR ANNUAL DINNER 25TH SEPTEMBER 2007

We are looking at bus outings to various place of interest. i.e. Powerhouse Museum, RTA central control centre and several interesting places.

.....

We now have six computers (one 98, one Mini-Mac, three XP, and now one Vista) available to members and as a result of unauthorized persons using our equipment passwords are now in use. Please do not give them out to others. If they want access then you will need to be there and a small charge of \$5-00 is applicable to non members.

.....

The new Telstra tower is now up and running and should have made mobile phone coverage better. It also covers wireless broadband, but the results on this are still in the early stages.

.....

There are 10 members taking our beginners classes for this session. Unfortunately we couldn't take more as we are restricted to three instructors

.....

An application has been sent in to the CDSE (Community Development Support Expenditure) for funds to upgrade, purchase newer equipment and to keep up with technology.

.....

I was going to include an article on setting up a word document but it will be in a later issue of our newsletter

.....

Don't forget to visit our web page garaclub.info for informative sites to visit.
